

# DRIP IOT Presentation Cody Jackson

## THESIS STATEMENT

## You love your stuff, right?

There are those pictures of your days in college, that table that Aunt Suzie gave you for your first home, your laptop with hours and hours of work stored on it.

What would you do if it all got destroyed?

Or...

### What would you do to keep it safe?

We need water in our homes to make our lives easier, but it can really be a hazard to our stuff and wallets. Between the threat of flooding, mold and water leakage, it's a surprise we can even sleep at night...

### PROBLEM

## The Problem

It's every homeowners nightmare. You leave for a couple days on a well-deserved vacation, only to come back to a house full of water. So much stress and worry over something so simple as a leaky pipe.

Or worse, one day you are just making the rounds of the house. You smell something a little musty. What could that be? Black mold.

It's so simple, you almost would think someone would have fixed it by now.

### STATISTICS

## It Won't Happen to Me

### A campaign reports that there are

### 650 water main breaks per day

Source: American Water Resources (http://www.awrusa.com/american-water-resources/about-us/ news/articles/6\_Questions\_Every\_Homeowner\_Should\_Have\_About\_Water\_Pipes.html)

## Resulting in an average cost of repair between \$500 - \$10,000 to replace tile, clean up water, and eliminate black mold

Source: American Water Resources (http://www.awrusa.com/american-water-resources/about-us/ news/articles/6\_Questions\_Every\_Homeowner\_Should\_Have\_About\_Water\_Pipes.html)

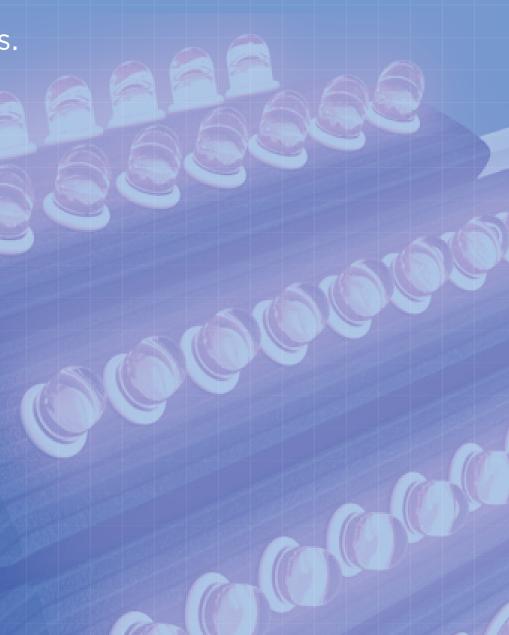

## SOLUTION

## **The Solution**

Drip will:

- Eliminate the threat of water damage and black mold.
- Allow homeowners to have peace of mind in their daily lives.
- Increase heating efficiency

All while informing the homeowner of everything it is doing.

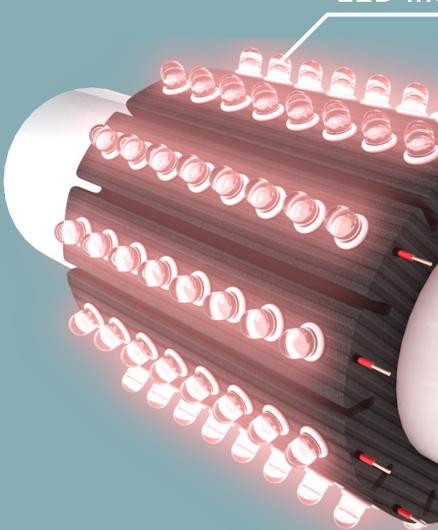

## EXPLANATION

## Let Me Explain

The main component to our system is a tubing which is slid around water pipes during the installation process.

The tubing flows naturally into the process as it is created to be put together exactly as the pipes themselves are installed. All the workers have to do is simply add this into their regular flow as a last step.

## **DRIP**

### **LED Indicators**

### Expandable Water-sensitive Tube

### Standard Piping

## COMPETITIVE ANALYSIS

## Who Else is Doing This? Notion

- Smart home system with wide range of abilities.
- Water leak detection limited to a sensor placed on ground which activates when water touches it.

### **OnSite Pro**

- Smart valve which pairs with existing smart-system and pipes.
- Water leak detection based on drop in water pressure beyond the programmed norm.

### Water Hero

- Smart valve which pairs with external sensors to detect pressure drop as well as existence of moisture outside pipes.
- Unit will send homeowner and plumber an alert.

### PERSONAS

**Jimmy Milford** Age: 29 Income: \$150,000/yr Mechanical Level: Can Fix a Lightbulb

Jimmy loves to travel. As a Senior User Experience Director, he often travels to different countries to work with different companies. Jimmy likes to have his own space at home that he can change to fit his needs. His greatest worry about owning a home is that he is responsible for maintaining and fixing it if necessary. He is so often away from home and when he is there he doesn't have the time or energy.

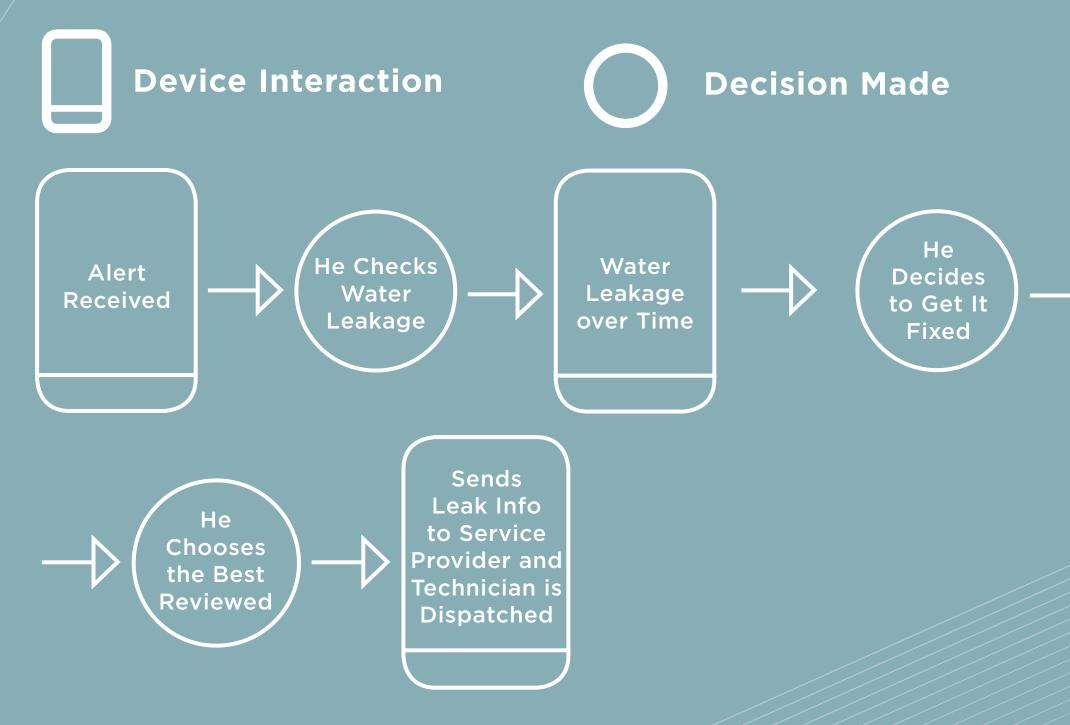

"I don't want to have to worry about it."

### PERSONAS

## Persona Use Case Scenario

Jimmy is on vacation with his wife in London. He receives an alert that there is a leak in his smart homes basement. Next, he needs to decide whether he needs to get it fixed immediately or if he can wait until they return home. Lastly, if needed, Jimmy needs to find a service provider near his house to respond to the emergency.

## **Are People Interested?**

According to Business Insider, the market for smart-home development is on the rise. With smart-home technology on the market since 2010, the Early Adopters are out and we are currently in "The Chasm". Right now is a integral time in determining whether the smart-home will take off or just be a fad. Business Insider suggests that if enough features make smart-homes interesting enough to consumers, the market will begin to rise around 2017 and continue until around 2030.

: Business Insider (http://www.businessinsider.com/the-us-smart-home-market-report adoption-forecasts-top-products-and-the-cost-and-fragmentation-problems-that-could-hindergrowth-2015-9)

### **BI INTELLIGENCE**

## DEMOGRAPHICS

## Who are Those People?

According to a 2015 report by Icontrol, the age range which is most interested in smart home technology are people ages 25 - 34.

### What are They Looking For?

Security 90% Savings 70% Maintenance 48% Environment 47%

### EXPERIENCE STRATEGY

## **Experience Strategy Design Points**

 Help users to feel confident that their homes won't flood.

• If something does happen, make dealing with the issue manageable and simple.

• Engage users with information that they can comprehend.

## **Experience Strategy Components**

### The Tube

- Senses leak
- Contains leak
- Illuminates leak location
- Tracks leak flow over time

• Tracks heat and flow efficiency

### The App

- Notifies user of leak
- Prompts user to respond
- Provides list of
- qualified service providers
- Allows user to turn water on and off
- Shows leak location on house schematic
- Provides service provider with list of potential parts required

## **DRIP**

The Hub • Serves as valve to shut off water to leak location • Contacts chosen parties (ie: home owner, chosen service provider, etc.) with leak information

## TARGET AUDIENCE

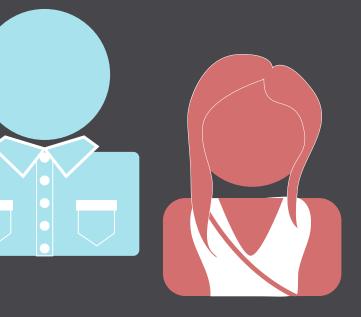

## What do They Look Like? **Primary Target Market**

- Perspective First-time Homeowners
- Ages 25 35
- Upper-middle class income (\$150,000 \$300,000/year)
- Technologically savvy and not mechanically inclined

• Interested in having a home which interacts with them as much as their smart devices do

### **Secondary Target Market**

- High-end Smart home Developers
- Selling condos, apartments, or homes which are smart enabled and wanting to add more features
- Technologically and millennial market savvy

## **Testing Plan**

• Living room of Participant's house, as it is an informal setting which will make the subjects more comfortable.

- Device Setup 2012 Macbook Pro 1440x900 screen
- Interactive Prototype High-fidelity Mobile Prototype Invision.com Setup for Persona A use case scenario

Session Date: Thursday October 6, 2016 Session Duration: 5-10 mins/each

• Determine whether users can perform primary use case scenario

- Determine if users understand the language used and can make decisions based on it
- Determine whether iconography and color usage accurately describe app usage.

## Participants

Sher Zannifer

Gabriella lacovetti

Michael Nannini

Initial Scenario

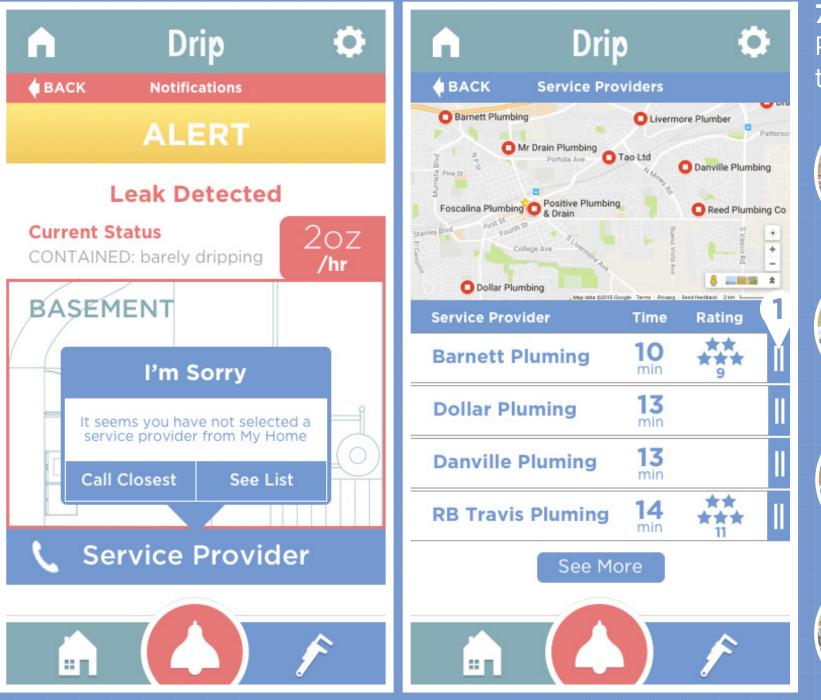

"You are on a vacation and you receive a notification that your house has a leak in it. You need to respond by calling a plumber. How do you do it?"

• Testing Variables If participant chose to "Call Closest": Redirect to "See List" to see if they could navigate that screen.

 Iconography and Color Scheme Did you find particular significance to the colors in the design?

## **Initial Scenario**

"You are on a vacation and you receive a notification that your house has a leak in it. You need to respond by calling a plumber. How do you do it?"

**75%** of participants got stuck on the Service Providers page because they didn't understand the meaning of the double bars. **1** 

Call Closest Plumber = Pass Call Plumber picked from list = Fail

Call Closest Plumber = Pass Call Plumber picked from list = Fail

Call Closest Plumber = Pass Call Plumber picked from list = Fail

Call Closest Plumber = Pass Call Plumber picked from list = Pass

## **Testing Variables**

If participant chose to "Call Closest": Redirect to "See List" to see if they could navigate that screen.

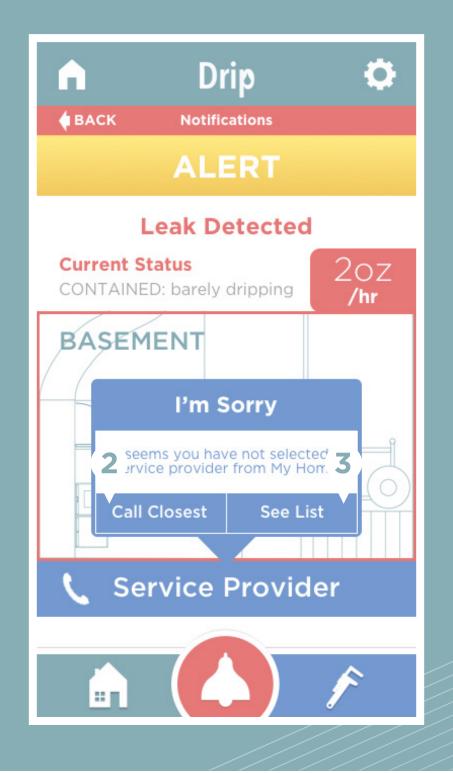

**50%** of participants chose to call the closest plumber while the other chose to see a list

*"…I wouldn't know* what to look for in a plumber anyways…"

"It just seemed easier..."

## DRIP

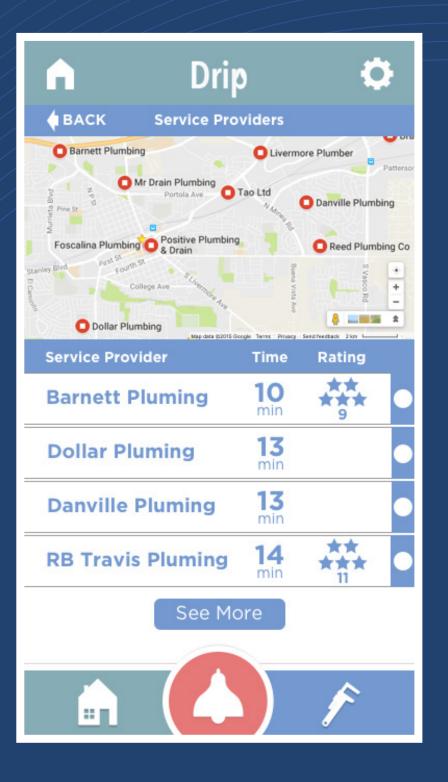

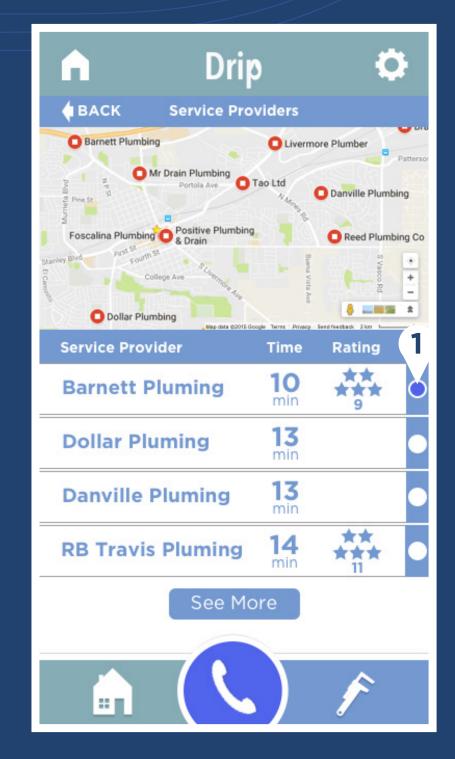

*"I want to know exactly who is in my house..."* 

*"It said the leak was contained, so I wanted to make sure I got the best plumber."* 

## **Design Improvement**

## DRIP

### **Design Feedback**

75% of participants got stuck on the Service Providers page because they didn't understand the meaning of the double bars.

### Design Decision 1

New design allows users to select which service provider they want to call. The center button changes based on the action at hand.

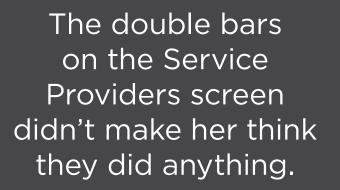

## Iconography and Color Scheme

"Did you find particular significance to the colors in the design?"

The color scheme is lively and fun.

She wasn't sure which of the buttons was the right one until she read the label.

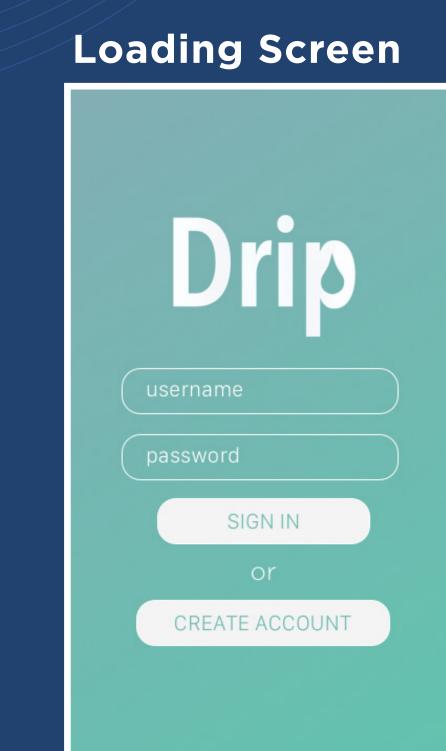

## **DRIP**

He realized that everything with a color background was clickable. This allowed him to realize that the double bars was a button.
